Euro fillet box 15 kg / 20 liter - 600 x 400 x H 155 mm - with drainage - blue

Product specifications

External dimensions (L x W x H)	600 × 400 × 155 mm
Internal dimensions (L x W x H)	468 × 344 × 140 mm
Capacity	20 liter
Handles	Open
Sidewalls	Closed
Material	HDPE
Article number	83640300
Weight (kg)	1,6 kg
Temperature range	-30°C to +40°C, briefly up to +90°C
Color	Blue
Bottom	Sloping base with four drain holes and sidewards outlet in top rim
Stacking height (mm)	140
Nesting height	50

Properties

- **Euro fillet box 15 kg / 20 liter. Dimensions 600 x 400 x H 155 mm**
- **The 600 x 400 mm Euronorm size offers logistical advantages during transport and storage**
- **With a curved base construction and 4 drainage holes in the corners**
- **With water drainage in the upper rim, directed to the outside of the fillet box**
- **Thanks to this design, meltwater does not run like a waterfall through all the boxes below, but is channelled along the outside**
- **This helps preserve the quality, freshness and colour of the fish**
- **The fillet boxes are stackable and nestable**
- **The nesting principle provides a space saving of up to 65% - an important advantage in processing areas and logistics**
- **With a marking as a visual stacking/nesting aid**
- **The handgrips are particularly strong and user-friendly**
- **Food-safe and suitable for direct contact with food**
- **Easy to clean and with good drainage of wash water**
- **Very robust design for a long service life**
- **Options: printing - version without drainage (from 1,000 pieces)**

Description

15 kg fish fillet box (20 liter) in **Euronorm format 600 x 400 x H 155 mm with drainage holes** in the corners and water drainage to the outside of the box. Designed for efficient logistics and the safe distribution of fresh fish.

Product details

The fillet box is equipped with an intelligent **drainage system**. The base is curved, directing leaking water towards the outer edges. **Drainage holes** are positioned in the four **corners** of this **curved base**. Meltwater and slime are therefore effectively drained away. When the boxes are stacked, this leaking water is then directed to the **outside** of the **box below**. This prevents it from coming into contact with the contents underneath, i.e. the fish. As a result, the quality, freshness and colour of the fish are optimally preserved. The fish boxes are **stack-nestable**. When empty boxes are nested, they provide a space saving of **up to 65%**. An arrow marking on the upper rim of the fillet box indicates how the box should be positioned for nesting. The fillet box has a 20-liter capacity and is suitable for up to 15 kg of fish.

The Euro fillet boxes combine perfectly with **Euro pallets** (1200 x 800 mm) or **industrial pallets** (1200 x 1000 mm). Respectively, 4 or 5 fillet boxes measuring 600 x 400 mm fit on one pallet. This provides efficient logistics and **optimal use of space** during storage.

Application

Euro fillet boxes are widely used in the **processing** and **distribution** of fresh fish. They are often used in combination with plastic Euro pallets, such as our H1-F Euro fish pallets with 12 mm raised edges, on which the Euro fillet boxes can be safely centred.
