Product specifications

External dimensions (L x W x H)	600 × 400 × 225 mm
Internal dimensions (L x W x H)	434 × 319 × 220 mm
Capacity	32 liter
Handles	Open
Sidewalls	Closed
Material	HDPE
Article number	83860300
Weight (kg)	2,54 kg
Temperature range	-30°C to +40°C, briefly up to +90°C
Color	Blue
Bottom	Closed base with four drain holes and sidewards outlet in top rim
Stacking height (mm)	208
Nesting height	55

Properties

- **Euro fillet box 18 kg / 32 liter. Dimensions 600 x 400 x H 225 mm**
- **The 600 x 400 mm Euronorm size offers logistical advantages during transport and storage**
- **With a curved base and 4 drainage holes in the base**
- **With water drainage in the upper rim, directed to the outside of the fillet box**
- **Thanks to this design, meltwater does not run like a waterfall through all the boxes below, but is channelled along the outside**
- **This helps preserve the quality, freshness and colour of the fish**
- **The fish boxes are stackable and nestable**
- **The nesting principle provides a space saving of up to 75% - an important advantage in processing areas and logistics**
- **With a marking as a visual stacking/nesting aid**
- **The handgrips are particularly strong and user-friendly**
- **Both short sides feature a textured area for temporary stickers**
- **Food-safe and suitable for direct contact with food**
- **Easy to clean and with good drainage of wash water**
- **Very robust design for a long service life**
- **Options: printing - transponders**

Description

18 kg Euro fillet box (32 liter) in **Euronorm format 600 x 400 x H 225 mm**, **with drainage holes** in the corners and water drainage to the outside of the box. Designed for efficient logistics and the safe distribution of fresh fish and fish fillets.

Product details

The Euro fillet box is equipped with an intelligent **drainage system**. The base has a roof-shaped design, directing leaking water towards the outer edges. **Drainage holes** are positioned in the four **corners** of this **curved base**. Meltwater and slime are therefore effectively drained away. When the boxes are stacked, this leaking water is then directed to the **outside** of the **box below**. This prevents it from coming into contact with the contents underneath, i.e. the fish. As a result, the quality, freshness and colour of the fish are optimally preserved.

The fillet boxes are **stack-nestable**. When empty fillet boxes are nested, they provide a space saving of **up to 75%**. An arrow marking on the upper rim of the fillet box indicates how the box should be positioned for nesting. The fillet box has a 32-liter capacity and is suitable for up to 18 kg of fish.

The Euro fillet boxes combine perfectly with **Euro pallets**. Exactly **four** 600 x 400 mm fillet boxes fit on one Euro pallet (1200 x 800 mm). This provides efficient logistics and **optimal use of space** during storage.

The fillet boxes are equipped with a provision for sealed transponders (hard tags) for track-and-trace of the boxes and their contents. These RFID tags are available on request.

Application

Euro fillet boxes are widely used in the **processing** and **distribution** of fresh fish and fish fillets. They are often used in combination with plastic pallets, such as our H1-F Euro fish pallets, on which the Euro fillet boxes can be safely centred.
