Stacking bin - 800 x 400 x H 200 mm - type MIDI BOX - closed handgrips - smooth base - grey

Product specifications

External dimensions (L x W x H)	800 × 400 × 200 mm
Internal dimensions (L x W x H)	748 × 348 × 196 mm
Max. stacking load (kg)	200 kg
Capacity	54 liter
Handles	Closed
Sidewalls	Closed
Material	PPC
Article number	6488.005.502
Weight (kg)	2,7 kg
Temperature range	-20°C to +50°C, briefly up to +90°C
Color	Grey
Bottom	Closed, smooth
Colorcode	RAL 7040
Load capacity (kg)	20
Quantity per pallet	33
Stacking height (mm)	190

Properties

- **Large-volume stacking bin from the MIDI BOX range. Dimensions: 800 x 400 x H 200 mm - capacity 54 liter**
- **The format is designed around a standard Euro pallet footprint of 1200 x 800 mm**
- **Exactly 3 bins fit on one layer of a Euro pallet. Further stacking can then take place compactly and without wasted space**
- **The plastic stacking bin is fully closed - both side walls and base**
- **With practical recessed handgrips and a smooth base**
- **The closed handgrips allow optimal use of the bin's internal volume**
- **Bins measuring 800 x 400 mm remain easy to handle, provided they are not overloaded. Transport trolleys ensure easy mobility**
- **Due to their size, MIDI BOXES are often used for custom-made solutions, for example with picking openings and dividers**
- **Options: printing - loose-fit lid - transport trolleys**

Description

MIDI BOX plastic stacking bin in **Euronorm format** (**800 x 400 x H 200 mm** - 54 liter) with practical recessed handgrips and a smooth base. The closed handgrips allow the full volume of the bin to be used efficiently.

Product details

The dimensions of our **MIDI BOX** are based on the footprint of a standard Euro pallet (1200 x 800 mm). Exactly **3 bins** fit on one layer of a **Euro pallet**. This makes optimal use of the available pallet space while minimising handling, as only 3 bins are used per level. The modular **800 x 400 mm** size therefore ensures **no wasted space** and enables **compact stacking** on Euro pallets. In distribution centres with automated transport systems such as roller conveyors and shuttle systems, this Euronorm size can also be used without difficulty in many cases.

Applications

MIDI BOXES are widely used for **bulky goods** and products that do not fit into a standard 600 x 400 mm bin. Users can be found in industry and trades, as well as in hospitality, catering and logistics. Private users also make frequent use of our MIDI BOXES. In addition, we often use these large-volume bins for custom-made solutions, for example with picking openings or dividers for small parts.

Thanks to its standardised dimensions (800 x 400 mm), the MIDI BOX stacks easily with other Euronorm bins measuring 800 x 400 mm or 400 x 400 mm. This **modular bin** also combines perfectly with standardised Euro-format pallets, transport trolleys or roll containers. The stacking bin is food-safe and hygienically designed for easy cleaning.
