Description

25 kg fish box (40 liter) in **Euronorm format 800 x 400 x H 225 mm** with a **closed base**. Designed for the safe handling and distribution of fresh fish, without leakage of meltwater or other liquids.

Product details

The Euro fish boxes are **stack-nestable**. When empty boxes are nested, they provide a space saving of up to **75%**. An arrow marking on the upper rim indicates how the box should be positioned for nesting. The fish box has a 40-liter capacity and is suitable for up to 25 kg of fish.

The Euro fish boxes combine perfectly with **Euro pallets**. Exactly **three** 800 x 400 mm fish boxes fit on one Euro pallet (1200 x 800 mm). This provides efficient logistics and **optimal use of space** during storage.

The fish boxes are equipped with a provision for sealed transponders for track-and-trace of the boxes and their contents. These RFID chips are available on request.

Application

Euro fish boxes are widely used in the **processing** and **distribution** of fresh fish. They are often used in combination with plastic pallets, such as our H1-F Euro fish pallets, on which the Euro fish boxes can be safely centred.

This version **without base holes** is also frequently used as a **collection tray** beneath Euro fish boxes with drainage. The boxes are also used as collection bins for fish waste; in that case, they can be printed with the relevant CAT. marking.
