- **Certified as a UN box for highly dangerous goods with code X**
- **For transport and storage of solid dangerous goods in packing groups I, II and III**
- **Approved as a UN overpack type 50H: large plastic pallet box with lockable lid**
- **Maximum payload: 800 kg**
- **Stack load: max. 1600 kg**
- **With 3 runners for maximum stability and load capacity**
- **The runners are integral with the box - for a long service life**
- **Fitted all around with impact protection above the entry openings**
- **Inside walls are completely smooth and flat - easy to empty and easy to clean**
- **Made from virgin PE and highly chemical-resistant**
- **Stable stacking via the integrated stacking lugs on the corners**
- **Very robust one-piece pallet box that reliably protects your dangerous goods**
- **Options: RFID transponders - QR code and barcode - printing - available in various colours**

Description

Light grey large-format plastic pallet box (1200 x 1000 x H 1140 mm – 1000 liter), type CB3 High, with grey lid and tie-down straps. This robust plastic pallet box is produced in one piece, including the pallet runners. The box is reinforced all around with an impact protection bumper above the entry openings. This acts as a buffer against impact damage. The box has UN code 50H/X for the transport and storage of dangerous solid substances in packing groups I, II and III, including lithium batteries and accumulators (not critically defective). The inside is closed and smooth, allowing easy cleaning. The PE plastic used is highly chemical-resistant. The plastic pallet box is supplied with a matching drop-on lid, which is locked using four tie-down straps. These are secured in the corner elements. The box complies with the regulations set out in the ADR for road transport, as well as the rules for transporting dangerous goods by rail (RIO), by sea (IMDG Code) and by air (IATA-DGR).
