Article number: 30.KB617.6

FRESH BOX folding crate - 600 x 400 x H 170 mm - fully perforated - 4 open handgrips - green

Product specifications

External dimensions (L x W x H)	600 × 400 × 170 mm
Internal dimensions (L x W x H)	570 × 370 × 161 mm
Capacity	33 liter
Handles	Open
Sidewalls	Perforated
Material	HDPE
Article number	30.KB617.6
Weight (kg)	1,9 kg
Temperature range	-30°C to +40°C, briefly up to +90°C
Color	Green
Bottom	Perforated
Folded height	50
Quantity per pallet	200
Stacking height (mm)	163

Properties

- **Robust green plastic folding crate from the FRESH BOX series**
- **Euronorm format 600 x 400 x H 170 mm - capacity 33 liter**
- **Folded height only 50 mm - for space-saving storage and return transport**
- **When stacked, folded crates take up only around 40 mm in height per crate**
- **Ideal for space-saving storage and return transport - up to 80% space saving**
- **Fully perforated - both the side walls and the base**
- **The perforations provide good ventilation and allow moisture and condensation to drain away**
- **With 4 open handgrips for easy handling**
- **Fitted with an easy-lock system for easy release and folding of the side walls**
- **Suitable for fruit, vegetables, rolls, bread, fresh produce and a wide range of logistics applications**
- **Made from food-safe plastic**
- **Hygienically designed and easy to clean**
- **Options: loose-fit lid - coversheets**

Description

Robust plastic **folding crate** from the **FRESH BOX series** in Euronorm format (600 x 400 x H 170 mm - 33 liter). Finished in **green** and fitted with **perforated** side walls and base. Thanks to its folding construction, this crate combines a large usable volume with a very low height when empty.

Space-saving folding design

The four side walls can be easily released using the practical **easy-lock system** beneath the handgrips. Once released, the walls fold inwards. This reduces the height from 233 mm to just **50 mm**. When stacked, the folded crates take up only around **40 mm in height** per crate.

This allows up to **80% space saving** when storing empty crates and during return transport. Especially in logistics circuits with large volumes of empty packaging, this can result in significant savings.

Application

The FRESH BOX features **perforated side walls and base**. This allows air to circulate freely around the contents while moisture and condensation can drain away easily. The crate is therefore particularly suitable for applications where **ventilation** is important, for example for the storage and transport of **fruit, vegetables and other fresh produce**. The FRESH BOX is also very suitable for bread and rolls.

Thanks to the four **open handgrips**, the crate is easy to handle from all sides. Its robust construction makes the FRESH BOX suitable for intensive professional use in logistics, distribution, retail and the food industry.

Euronorm and load capacity

With its standardised base dimensions of **600 x 400 mm**, the folding crate fits into existing Euronorm logistics systems and combines well with standardised pallets, mobile plastic trolleys and roll containers.

The folding crate has a **load capacity of 25 kg** and a **stacking load of 200 kg**. This allows filled crates to be stacked safely and efficiently.
