Description

The pallet lid 800 x 600 mm is designed to centre Euro standard bins on a half Euro pallet. A half Euro pallet accommodates two 600 x 400 mm bins per layer. The pallet lid fits completely over these two bins. Thanks to its precise fit, a stable transport unit is created. By using a pallet lid, another pallet can be placed on top. Centring rims on both long sides of the pallet lid secure this pallet, allowing multiple pallet units to be stacked safely.
The pallet lid is equipped with integrated strapping guides, both longitudinally and transversely. This enables the pallet load to be additionally secured easily with tension straps.
The pallet lid can be used in combination with a wide range of Euro standard bins, including VDA-KLT automotive bins, E meat containers, CBL crates and Euro standard storage bins.
