Article number: 9074.000.623

Storage bin type Store Box 9074 - 250 x 148 x H 130 mm - blue (PU = 32 pcs)

Product specifications

External dimensions (L x W x H)	250 × 148 × 130 mm
Internal dimensions (L x W x H)	190 × 130 × 120 mm
Capacity	3.7 liter
Sidewalls	Closed, with flared walls
Material	PP
Article number	9074.000.623
Weight (kg)	0,3 kg
Temperature range	-20°C to +50°C, briefly up to +90°C
Color	Blue
Bottom	Closed, with stacking system
European Article Number	7424909191172
Quantity per pallet	512

Properties

- **Store Box plastic Storage bin type 9074. Dimensions: 250 x 148 x 130 mm (l x w x h) - 3.7 liter**
- **Equipped with a generous hand hole at the front**
- **Internal dimensions: 220/190 x 130 x 120 mm (l x w x h)**
- **With closed walls and base**
- **Flared side walls - for optimum volume**
- **With label area at the front**
- **Store Boxes are stackable with each other - with centring lugs to prevent shifting**
- **The hanging edge at the rear allows mounting on rails**
- **Made from impact-resistant polypropylene plastic (PP) - for industrial use**
- **The PP plastic is food-grade - for direct food contact**
- **The PP plastic used is flexible and low-noise - for a quieter workplace**
- **Largely resistant to chemicals and common cleaning agents**
- **Our Store Boxes are suitable for intensive and versatile use**
- **Options: label incl. protective film - transparent front flap - colours**

Description

Our Store Box type 9074 with dimensions 250 × 148 × H130 mm is the ideal solution for clear and efficient storage of parts, tools and small products in warehouses, workshops, offices and along production lines. With a length of 250 mm and a capacity of 3.7 litres, this compact plastic Storage bin combines a practical size with sufficient capacity, making it a perfect fit for shelving, racks or workbenches without wasting valuable space.

Made from impact-resistant polypropylene plastic (PP), this Storage bin is robust, durable and suitable for intensive daily use. The material is also weather-resistant and resistant to chemicals, making the bin suitable for industrial use in production, assembly, logistics and maintenance. In addition, the PP plastic used is food-grade, which is why the food sector, pharmaceuticals and the chemical industry also make extensive use of our Store Boxes. Thanks to the use of flexible PP plastic, Store Boxes are also low-noise in use - for a calm working environment.

The practical design makes this plastic Storage bin easy to handle. The generous hand hole ensures that the contents are easy to reach. Store Boxes can be stacked securely with boxes of the same width. The integrated hanging edge at the rear makes the bin suitable for standard rail systems, creating clear vertical storage. This combination of stackability and hanging options saves space and increases efficiency in a warehouse or workplace.

The specific colour of the Store Box supports clear colour coding, making it easy to organise different products or components. Whether you stack several bins on top of each other or organise them horizontally on a workbench, this Storage bin provides a quick overview and prevents products from getting lost. This makes the bin not only ideal for industrial applications, but also perfect for office organisation, hobby rooms or workplaces where efficiency and clarity are important.
