Description

The CB3 High pallet box with funnel base measures 1200 x 1000 x H1140 mm and has a capacity of 850 liter. This large-format plastic pallet box features a 120 x 120 mm outlet on the underside, centrally positioned in the base. This opening can be manually closed with a slide valve that is operated from the short side of the box.
The inside of the CB3 High box is smooth and has a funnel-shaped lower section with a 35-degree slope, allowing the contents to flow out easily when the slide valve is opened. This eliminates the need to tilt or tip the box. Ideal for dosing dry bulk goods such as seeds, grain and dry animal feed, but also granules, wood pellets and small components. The pallet box and the entire interior are made from food-grade plastic, so direct contact with food is not a problem.
