Company logo print - hot stamp

Product specifications

External dimensions (L x W x H) 200 x 200 mm

Article number option-companylogo

Properties

Printing your company logo by hot stamping on plastic bins, pallets and pallet boxes

Single-colour print, as required

Maximum size: 200 x 200 mm

Size depends on the available space

Hot stamp is wear-resistant and long-lasting

Description

Printing your company logo by hot stamping. The print is single-colour and can be produced in various colours. The logo size depends on the product type - i.e. how much space is available. The maximum size is 200 x 200 mm. Hot stamp logo marking offers many advantages: the logo is burned into the product at high temperature, and the colour layer of the stamping foil is permanently fused to the plastic pallet box. This results in a long service life and excellent abrasion resistance. In addition, the print is insensitive to friction from products rubbing against each other and does not fade even after frequent washing at high temperatures. Ask our product specialists about the exact specifications and options.
