Coversheets are stretched over the pallet boxes

The elastic securely encloses the contents

Made from strong LDPE plastic film with a thickness of 30 micron (μ)

Packaging unit: 200 pieces (PU = 200)

Description

Plastic coversheet (1250 x 850 x H250 mm) for hygienically closing 1200 x 800 mm pallet boxes. Designed to protect food and other sensitive products. The coversheets prevent dirt and dust from coming into contact with the contents. This minimises the risk of food contamination or the contamination of pharmaceutical products. The coversheets are intended for single use and are used during transport and storage of food and semi-finished products in plastic pallet boxes. They are practical to use. The coversheets are made from LDPE plastic and have a thickness of 30 micron. The covers are fitted with an elasticated edge, so the coversheet stays securely around the pallet box and the product is fully enclosed. The combination of a plastic pallet box with a coversheet provides optimal product protection during transport and storage.
