

Euronorm stacking crate - 600 x 400 x H 85 mm

Product specifications

External dimensions (L x W x H)	600 × 400 × 85 mm
Capacity	16 liter
Handles	Closed
Sidewalls	Perforated
Material	HDPE
Article number	3648.720.506
Weight (kg)	1,2 kg
Temperature range	-30°C to +80°C
Color	Grey
Bottom	Perforated, reinforced
Quantity per pallet	108

Properties

Fully perforated Euro stacking crate Euronorm (600 x 400 x H 85 mm - 16 liters) in heavy-duty design

Food-grade light grey crate with closed handles, designed as a gripping edge

Equipped with perforated side walls and a perforated, reinforced bottom

Successfully used in particularly demanding applications

Suitable for situations where fine perforation is important

Description

In an industrial setting where precision and careful ventilation are crucial, the fully perforated Euro stacking crate Euronorm (600 x 400 x H 85 mm - 16 liters) shines. These robust crates, designed for heavy-duty applications, provide a reliable solution for storing delicate materials. Their food-grade, light grey design with closed handles, serving as gripping edges, makes them easy to handle and stack. What sets these crates apart are not only the perforated side walls but also the perforated, reinforced bottom. These meticulously placed perforations contribute to controlled air circulation, crucial for maintaining the freshness of the stored contents. Consequently, they are exceptionally suitable for particularly demanding applications where accuracy and ventilation are vital. Moreover, the fine perforation of these crates allows for storing specific materials requiring precise ventilation to maintain their quality. These stacking crates have proven their worth in sectors such as food processing, pharmaceuticals, and other industries where strict standards for storage and ventilation apply. Their versatility and ability to meet the demands of highly demanding environments make them an indispensable tool for precise and sensitive storage needs.
