Fillet box 15 kg - with drain holes

Product specifications

External dimensions (L x W x H)	600 × 400 × 155 mm
Capacity	20 liter
Handles	Open
Sidewalls	Closed
Material	HDPE
Article number	83640300
Weight (kg)	1,6 kg
Temperature range	-30°C to +40°C, briefly up to +90°C
Color	Blue
Bottom	Sloping base with four drain holes and sidewards outlet in top rim

Properties

- **Filleting crates are stackable and nestable.**
- **The nesting principle saves up to 70% of space.**
- **Features a domed bottom construction with 4 drainage holes and lateral discharge in the top edge.**
- **Sturdy design for trouble-free and long-lasting use.**

Description

Filleting crate in Euro-standard dimensions of 600 x 400 mm with a height of 155 mm. Thanks to its Euro-standard size, the filleting crate can be perfectly combined with plastic pallets, racking systems, and roll containers. The fish crate is both stackable and nestable. When nested, it provides up to 70% space savings, making storage and return transport significantly more efficient. The filleting crate is equipped with an advanced drainage system. Drip water and slime are efficiently drained through the drainage holes located in the four corners of the base, preventing these substances from entering the crate below. This helps maintain the quality, appearance, and freshness of the fish. The crate has a capacity of 20 litres and a load capacity of 15 kg. Its stackable and nestable design ensures substantial space savings during empty storage and return logistics.
