## Description

The foldable Smartbox type 1389.C2 is designed for efficient return logistics. When empty, the Smartbox can be folded down easily, reducing transport volume by more than 50%. The same benefits also apply when storing empty units, saving a significant amount of space - an important advantage since warehouse space is valuable. The Smartbox is widely used in industrial logistics thanks to its particularly robust design. The drop door ensures easy loading and emptying of the box. Because the Smartbox is made from virgin HDPE, direct contact with food is not a problem. This makes the food sector a well-known user of the Smartbox.
