Article number: 83730800

Pallet collar - foldable - 6 hinges - 1200 × 800 × H 400 mm - closed - grey

Product specifications

External dimensions (L x W x H)	1200 × 800 × 400 mm
Internal dimensions (L x W x H)	1150 × 750 × 400 mm
Material	HDPE
Article number	83730800
Weight (kg)	9,5 kg
Temperature range	-20°C to +30°C / briefly up to +90°C
Color	Grey

Properties

- **Foldable plastic pallet collar, suitable for Euro pallet size 1200 × 800 mm**
- **Suitable for direct contact with food**
- **Sits on the pallet deck and does not overhang - only the four black corner elements do**
- **The corner elements are sliding: extended for centring on the pallet, retracted to prevent damage and simplify storage**
- **Equipped with 6 hinges, resulting in a folded size of 1200 × 400 mm**
- **When folded, exactly two units fit on one Euro pallet**
- **Volume saving of approx. 75%**
- **Collars can be stacked on top of each other (stack-through up to 4 high)**
- **Can be closed off with a pallet lid**
- **Walls are closed and easy to clean**
- **With pallet collars, a pallet is transformed into a flexible pallet box**
- **Options: pallet lid**

Description

This plastic pallet collar does not extend beyond the pallet - only the 4 corner elements do. The collar therefore sits entirely on the pallet deck. The four corner elements are sliding. In the extended position they ensure accurate centring on the pallet. When slid back in, empty storage is more compact and damage to the corner elements is prevented.
The collar is hinged at 6 points: at all 4 corners and in the middle of both short sides. As a result, a folded collar has exactly the same length as the pallet, i.e. 1200 mm, and can be stacked without overhanging.
When the collars are unfolded for use, the 4 corner elements are extended. This centres the collar on the pallet. These corner elements also enable “stack-through”, allowing multiple collars to be stacked on top of each other. Depending on the application, we recommend stacking a maximum of 4 elements. The stack can then be covered with a pallet lid. If required, another pallet can be placed on top. This creates a unit load that can be configured very flexibly and allows goods to be transported and stored particularly safely.
The pallet collar is made from food-grade plastic. In addition, the walls are easy to clean, ensuring optimum hygiene. The collar is used in the food industry, pharmaceuticals and cleanrooms - anywhere high standards of hygiene and safety are required.
