Article number: 50.NK.100.7x7 Printing possible

Glass basket 500x500mm blue - maximum glass height 73 mm - with red 7x7 compartment division - maximum glass diameter 63mm

Product specifications

External dimensions (L x W x H)	500 × 500 × 100 mm
Internal dimensions (L x W x H)	465 × 465 × 73 mm
Handles	4-sided - open, for added wearing comfort
Sidewalls	Open, for optimal washing results and a faster drying process
Material	PP
Article number	50.NK.100.7x7
Temperature range	-15°C to + 90°C
Color	Blue
Bottom	Open and extra reinforced, making it suitable for high loads and for use in basket transport machines with transport hooks.
European Article Number	7424901366387
Gripping aperture size	1
Maximum glass height	73
Maximum Ø glass	63

Properties

- **Our baskets guarantee safe transport and efficient storage of your glassware and tableware.**
- **The open design of the basket ensures optimal washing results.**
- **Determine the appropriate basket layout and height easily with the size chart. Request a size chart by calling or filling out our contact form.**
- **The basket has 4-sided receptacles for color clips (see accessories).**
- **Color clips can be clicked into the basket on all four sides, for example, to indicate contents.**
- **Suitable for use in basket transport machines with transport hooks.**

Description

Glass basket 500 x 500 mm with red 7x7 compartment divider

With our blue glass basket measuring 500 x 500 x H 100 mm, you can wash, transport and store glasses in one basket. The red 7x7 compartment divider is suitable for glasses with a maximum height of 73 mm and a maximum diameter of 63 mm. The open base and side walls allow washing water and drying air to reach the glassware, ensuring good access to the glasses during washing and drying.

Compartment divider for small glasses

The red 7x7 compartment divider keeps the glasses separate and gives each glass its own position in the basket. To ensure a proper fit, measure the diameter at the widest point of the glass. This point is not always at the top or bottom. This version is suitable when the largest diameter is no more than 63 mm and the glass height does not exceed 73 mm.

Open construction for cleaning

The open side walls and base allow washing water and drying air to pass through, keeping the glassware accessible during cleaning and drying. This helps the basket support good washing results and a faster drying process, without having to transfer the glasses to another basket in between.

Reinforced base for basket transport

The extra reinforced base makes this glass basket suitable for use in basket transport machines with transport hooks. You can therefore incorporate the basket into a washing process with mechanical basket transport. The open handles on all four sides also provide a grip for manual carrying and handling.

Food-grade polypropylene

Our glass basket is made from food-grade polypropylene, designated PP. The material has a temperature resistance of -15 °C to +90 °C, allowing you to use the basket within this temperature range. The external dimensions of 500 x 500 x H 100 mm and the internal height of 73 mm help you match the basket to your glassware and available space.

Colour clips for content identification

The basket has holders for colour clips on all four sides. With these separately available accessories, you can indicate the contents, for example, so that staff can identify the right basket more easily when sorting, transporting and storing glassware.
