Description

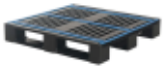

The glass basket 50.NKG.100.3X3 consists of a gray base basket with a green 3x3 compartmentalization. The maximum diameter of the glass determines which compartmentalization is suitable. Measure the widest point of the glass for this purpose. Note: the widest point of the glass is not always at the top or bottom.

The glass basket with dimensions of 500 x 500 x H 100 mm has an internal height of 73 mm. Glasses with a height of up to 73 mm can fit in this basket, such as shot glasses and whiskey glasses. The basket is also suitable for coffee cups and soup bowls. Due to the open basket design, washing water and drying air have very good access to glassware and porcelain. The dishwasher baskets thus achieve optimal washing results and a faster drying process. Moreover, the bottom is specially reinforced, allowing the basket to rotate in a basket transport machine with transport hooks. Transoplast glass baskets are exceptionally durable and have the best references in the market.
