Insulated box-in-box with lid - 400 x 300 x H 193 mm - stackable

Product specifications

External dimensions (L x W x H)	400 x 300 x 193 mm
Internal dimensions (L x W x H)	320 x 220 x 115 mm
Capacity	8 liter
Handles	Stacking bin: open - insulated box: recessed handles on ground level.
Sidewalls	Stacking bin: closed - insulated box: closed and smooth
Material	HDPE
Article number	30.0211.EPP
Weight (kg)	1,31 kg
Bottom	stacking bin: closed and reinforced - insulated box: closed and smooth
Quantity per pallet	88

Properties

Insulation box-in-box system, consisting of a plastic stacking container and a removable insulation box with a clamping lid.

The clamping lid seals hermetically, minimizing temperature loss.

The insulation box is made of EPP (25 mm), providing high insulation value and long lifespan.

The receiving stacking container has closed walls and bottom (see "Related products").

The stacking container offers additional protection for the insulation box.

Externally conforms to Euro norm size, allowing seamless stacking with other Euro norm stacking crates and containers (400 x 300 mm and 600 x 400 mm).
