Insulated box-in-box with lid - 400 x 300 x H 273 mm - stackable

Product specifications

| | |
|----------------------------------|--|
| External dimensions (L x W x H) | 400 x 300 x 273 mm |
| Internal dimensions (L x W x H) | 320 x 220 x 190 mm |
| Capacity | 12.4 liter |
| Handles | Stacking bin: open - insulated box: recessed handles on ground level. |
| Sidewalls | Stacking bin: closed - insulated box: closed and smooth |
| Material | HDPE |
| Article number | 30.0271.EPP |
| Weight (kg) | 1 kg |
| Bottom | stacking bin: closed and reinforced - insulated box: closed and smooth |
| Quantity per pallet | 64 |

Properties

Insulation box-in-box system, consisting of a plastic stacking crate and a removable insulation box with a clamping lid.

The clamping lid seals hermetically, minimizing temperature loss.

The insulation box is made of EPP (25 mm), providing high insulation value and long lifespan.

The accommodating stacking crate has closed walls and bottom (see "Related products").

The stacking crate provides extra protection for the insulation box.

External dimensions conform to Euro norm, allowing seamless stacking with other Euro norm stacking crates and bins (400 x 300 mm and 600 x 400 mm).
