## Description

MINI BOX plastic pallet box (1040 x 640 x H 670 mm - 285 liter) on 4 feet. A medium-sized plastic pallet box with closed side walls and base. The pallet box stands on feet, is easy to handle and stackable.

**The size**

MINI BOXES are medium-sized plastic pallet boxes. They provide an ideal intermediate size when stacking bins are too small and industrial-size pallet boxes (1200 × 1000 mm) are too large. Thanks to their dimensions, MINI BOXES can still be handled manually with ease. For this reason, every MINI BOX is fitted with generous handles. In addition, they are equipped with 4 feet, making them highly suitable for use with equipment such as forklifts. The feet make it possible to stack the boxes using internal transport equipment.

**The features**

All MINI BOXES are made of HDPE plastic and are therefore resistant to weather influences, moisture and cleaning agents. Thanks to the material used and the robust construction, the box is impact-resistant and particularly stable.

**Ease of use**

MINI BOXES are compact boxes that are easy to manoeuvre. They are easy to stack and therefore efficient in storage. Despite their compact size, MINI BOXES can store and transport considerable quantities of goods.
