Article number: 768.101.101

Mushroom crate / stacking crate - 400 x 300 x H 110 mm - blue

Product specifications

External dimensions (L x W x H)	400 × 300 × 110 mm
Capacity	13.2 liter
Sidewalls	Perforated
Material	PPC
Article number	768.101.101
Weight (kg)	0,2 kg
Temperature range	-20°C to +50°C, briefly up to +90°C
Color	Blue
Bottom	Perforated
Max. load capacity per box	3 kg

Properties

- **The mushroom crate is lightweight and particularly easy to handle**
- **Fully perforated for optimal ventilation - preventing condensation and moisture build-up**
- **With raised stacking corners to prevent pressure damage during stacking**
- **Manufactured from high-quality polypropylene (PP-C); a tough plastic for optimal durability**
- **The crate offers high strength despite its low weight**
- **Suitable for intensive use and repeated transport**
- **Thanks to its Euronorm dimensions (400 x 300 mm), suitable for use with other standardised load carriers (Euro pallets, industrial pallets, mobile plastic trolleys)**
- **Provides an efficient solution for logistics processes from the growing facility through to retail shelves**

Description

This stackable crate has been specially developed for use in the mushroom sector and offers a practical and efficient solution for **harvesting**, **transporting** and **selling** freshly harvested **mushrooms**. It is also an excellent choice for specialty mushrooms such as **portobellos** and **shiitake** (often hand-picked). The crate is optimally suited to logistics processes from the growing facility through to retail shelves.

The crate is **fully perforated**, allowing the mushrooms to **ventilate** optimally. Condensation and excess moisture are therefore effectively drained away. The **perforations** are also **smoothly finished** to help prevent product damage. The **raised stacking corners** also protect the delicate contents from damage during stacking.

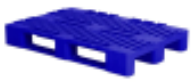

The base dimensions of the crate are **400 x 300 mm**, making it **Euronorm** compatible. This allows it to be easily combined with other standardised load carriers such as **plastic pallets** (Euro or industrial format) and **mobile plastic trolleys**. The crate can therefore be easily integrated into existing logistics systems from the growing facility through to retail shelves. At just 200 grams, the stacking crate is lightweight and particularly **easy to handle**. The crate is made from high-quality polypropylene (PP-C). This material is known for its **toughness**, good dimensional stability and high durability. The crate therefore combines low weight with high strength and reliability. It is designed for intensive and long-term use.

The mushroom crate offers an efficient solution for businesses that value product quality, ease of use and sustainable logistics.
