Description

BIG BOX plastic pallet box with a hinged drop door on one long side. Opening the drop door significantly reduces the lift-over height of the box, making loading much easier. This increases efficiency and supports a practical workplace layout. In addition, BIG BOX pallet boxes feature convex, outward-bulging wall panels, providing up to 10% more volume compared to conventional pallet boxes. BIG BOXES with a drop door are used universally. Assembly lines, order picking areas and warehouse locations in particular are very satisfied users of this practical pallet box variant.
