Description

The pallet lid 1200 x 1000 mm is designed to centre Euro standard bins on an industrial pallet. An industrial pallet fits 5 bins of 600 x 400 mm per layer. The pallet lid fits completely over these bins. Because the lid closes perfectly, a stable transport unit is created. Using this pallet lid also allows another pallet to be stacked on top. Centring rims on both short sides of the pallet lid secure the stacked pallet in place. This enables multiple pallet units to be stacked stably, without sliding off each other.
The pallet lid is equipped with integrated strapping channels for banding, both lengthwise and crosswise. This allows the pallet load to be additionally secured easily with lashing straps.
The pallet lid can be used in combination with a wide range of Euro standard bins: E meat crates, CBL crates, and other Euro standard (food) crates.
