Article number: 83292200

ESD pallet lid 1200 × 800 mm - for use with Euro standard bins - ESD version: electrically conductive plastic - black

Product specifications

External dimensions (L x W x H)	1200 × 800 × 82 mm
Material	HDPE with carbon compound
Article number	83292200
Weight (kg)	5,5 kg
Color	Black
Surface resistance	?1x40 E4 Ohm to <1x10 E11
Quantity per pallet	30

Properties

- **Robust 1200 × 800 mm pallet lid made from electrically conductive plastic (ESD material)**
- **Lid dimensions incl. rims: 1220 × 818 × H 82 mm**
- **Centres a complete pallet load with Euro standard bins (ESD version) – 4 × 600 × 400 mm per layer**
- **Suitable for all common Euro standard bins (made from ESD material)**
- **Creates a stable transport unit**
- **Prevents product damage and contamination**
- **Supports fire-safe use in (high-bay) warehouses with sprinkler systems**
- **With centring rims on both short sides of the pallet lid, so a next pallet can be placed on the lid without sliding off**
- **With provisions for applying lashing straps**
- **Pallet lids can be stacked inside each other. Nesting height 50 mm**
- **Options: QR codes and barcodes - RFID transponders**

Description

Our ESD pallet lids - made from electrically conductive material - are designed to prevent electrostatic build-up and subsequent discharge. This helps avoid damage to sensitive electronics. Our ESD pallet lids must be combined with plastic pallets and stackable bins that are also electrically conductive. The entire unit load must be conductive - from the top all the way down to the floor.
The 1200 × 800 mm pallet lid is designed to centre Euro standard bins on a Euro pallet. A Euro pallet can hold 4 bins of 600 × 400 mm per layer. The pallet lid fits fully over these bins. Because the lid closes perfectly, it creates a stable transport unit. Using this pallet lid allows a next pallet to be stacked on top. Centring rims on both short sides of the pallet cover secure the stacked pallet. This allows multiple pallet units to be stacked stably on top of each other without sliding.
The pallet lid features integrated strips for banding - both lengthwise and crosswise. This makes it easy to secure the pallet load even further with lashing straps.
The ESD pallet lid is combined with Euro standard bins in ESD version and a matching ESD Euro pallet. In this way, a safe unit load is created in which all safety aspects are considered - both load security and product safety.
