Description

The 800 × 600 mm pallet lid/pallet cover is designed to centre Euro standard bins on our half Euro pallet type CR2. A half Euro pallet can hold 2 bins of 600 × 400 mm per layer. The pallet lid fits fully over these bins. Because the lid closes perfectly, it creates a stable transport unit. Using this pallet lid allows a next CR2 pallet to be stacked on top. The profiling on top of the lid corresponds with the profiling of the CR2 pallet runners, preventing the pallet from shifting on the lid. This enables multiple pallet units to be stacked securely and stably.

The pallet cover features integrated strips for banding, both lengthwise and crosswise. This makes it easy to secure the pallet load even further with lashing straps.

The pallet cover can be used with a wide range of Euro standard bins: VDA-KLT automotive bins, E meat containers, CBL crates, Euro standard storage bins, etc.
