Retention pallet - plastic spill tray with grating - 1200 × 1000 mm - 220 litre - 3 runners

Product specifications

External dimensions (L x W x H)	1200 × 1000 × 395 mm
Dynamic load capacity	500 kg
Capacity	220 liter
Material	HDPE
Article number	99.LB1210S.220.R
Weight (kg)	46,45 kg
Color	Grey
Static load capacity	1000 kg
Quantity per pallet	5

Properties

- **Chemical-resistant spill tray with plastic insert grating**
- **Retention capacity: 220 litre**
- **Size: 1200 × 1000 × H395 mm**
- **Liquid-tight design**
- **Suitable for collecting polluting and hazardous liquids**
- **Equipped with 3 pallet runners**
- **Easy to move with a forklift truck or pallet truck**
- **Dynamic load capacity: 500 kg**
- **Options: lid**

Description

Retention pallet - spill tray with insert grating, both made from chemical-resistant plastic. Designed for collecting hazardous substances and other dripping liquids. This retention pallet is also used when filling and emptying drums and cans. Thanks to the plastic insert grating, leaking products are prevented from standing in their own liquid. A leaking oil drum, for example, will not remain in a layer of oil because the escaping liquid can drip away through the grating. The spill tray has a Euro-size footprint of 1200 × 1000 mm and a height of 395 mm. With 3 runners, the retention pallet can be moved easily using a forklift truck or pallet truck. The dynamic load capacity is 500 kg. The retention capacity is 220 litre.
