Product specifications

External dimensions (L x W x H)	2180 × 1000 × 790 mm
Internal dimensions (L x W x H)	2090 × 910 × 620 mm
Capacity	1150 liter
Sidewalls	Closed, reinforced
Material	HDPE
Article number	81941811.DUO-L2180
Temperature range	-30°C to +40°C, briefly up to +90°C
Color	Grey
Bottom	Closed, reinforced
Max. load capacity per box	700 kg
Max. static stacking load	3500 kg

Properties

- **Two SB3 plastic pallet boxes combined lengthwise into one robust box**
- **Size 2180 x 1000 x H790 mm - 1150 liter**
- **With closed side walls and base**
- **Fitted with 3 pallet sledes - produced in one piece with the box**
- **Suitable for direct contact with unpackaged food products (food-proof)**
- **The lower wall panels of the box are additionally reinforced with a ribbed buffer zone - to prevent impact damage caused by forklifts**
- **XL-size pallet boxes based on the SB3 box are highly suitable for heavy and intensive use**
- **A load capacity of 700 kg speaks for itself**
- **The inner walls are flat and smooth - for easy emptying and cleaning**
- **Two visible recesses for RFID transponders have been integrated into the upper rim - optionally to be fitted with QR codes or barcodes. The recesses are located on both long sides of the box**
- **The SB3 is also designed to be rim-stackable in XL size**
- **The underside of the pallet box is particularly strong and robust**
- **With a 1" outlet facility on the short side and a 2" outlet facility on the long side**
- **Options: Lid - 1" screw plug - 2" screw plug - check taps - print - QR codes and barcodes - colours - extra slede reinforcements - perforated - version on 9 feet**

Description

Product features

Thanks to its robust construction, the SB3 pallet box is ideally suited for custom-made products. In particular, the fact that SB3 boxes are moulded in one piece makes an important contribution to this. So there are no clipped-on sledes, but one solid unit. Because XL-size pallet boxes have a large capacity, the load on such boxes is usually considerable. That also calls for a stable design. An important aspect here is the impact resistance of the box. This is ensured by the heavily ribbed buffer zone above the entry openings. This impact zone is fitted around the entire box and serves as collision protection, preventing damage caused by impacts from, for example, forklifts. This is not unimportant for heavily loaded boxes that are also stacked. Stacking XL-size SB3 boxes is no problem, as the box is fitted with a standard, universal stacking rim. As a result, SB3 boxes in XL size are also stackable with one another.

Composition

This XL-size pallet box is made up of two SB3 plastic pallet boxes measuring 1200 x 1000 mm. Both boxes are divided, then connected and subsequently welded all around into one solid pallet box with dimensions of 2180 x 1000 x H790 mm.

Applications

The industries in which XL-size pallet boxes are used are very diverse. In all cases, however, they are intended for the storage or transport of long goods or bulky goods. The correct box size is important here, suitable for that one specific application. Transoplast has developed a wide range of XL-size pallet boxes as custom-made solutions. The choice is therefore already extensive. If your required size is still not included, please contact our product specialists - they will be happy to help you further.
