Description

Plastic stacking crate in **Euronorm format** 600 x 400 mm with **picking opening on the short side**. The height, including reinforced base, is 349 mm. The stacking crate is fully perforated, except for the panel below the picking opening. Labels or prints can be applied here. Thanks to the picking opening, the stacking crate is ideal for use as a storage bin. Due to its standardised dimensions, this storage bin can be stacked with all other Euronorm stacking bins and is perfectly compatible with standardised pallets, mobile plastic trolleys or roll containers. The stacking crate is food-safe and ventilated thanks to the large perforations in the walls and base. The base is reinforced for higher load capacity. **Picking opening dimensions: 265 x H 185 mm.**
