Printing possible

Stacking bin - 300 x 200 x H 118 mm - orange (smooth base)

Product specifications

External dimensions (L x W x H)	300 x 200 x 118 mm
Internal dimensions (L x W x H)	266 x 166 x 115 mm
Max. stacking load (kg)	100 kg
Capacity	5 liter
Handles	Closed
Sidewalls	Closed
Material	PP
Article number	30.312.GDH.6
Weight (kg)	0,42 kg
Temperature range	-20°C to +80°C
Color	Orange
Bottom	Closed, smooth
Colorcode	PMS 137 C
Load capacity (kg)	5
Quantity per pallet	272

Properties

Efficiently compatible with other Euronorm bins in 300 x 200 mm and 400 x 300 mm sizes

Quick recognition thanks to the striking orange colour, ideal for colour coding

Hygienic design with smooth, closed walls and bottom

Safely stackable up to 100 kg load

Ergonomic design with sturdy grip edges for easy handling

Durable and reliable in daily use

Suitable for mounting hinged lids

Description

Euronorm plastic orange stacking bin 300 x 200 x H118 mm – 5 litres

Compact Euronorm stacking bin for maximum efficiency

This plastic stacking bin in Euronorm size 300 x 200 mm offers the perfect balance between compactness and functionality. Thanks to the standardised format, the bin can easily be combined with other Euronorm bins, making it ideal for use in both hospitality and catering as well as industrial environments. The format enables efficient stacking, transport and storage without loss of space.

Unique benefits of the orange stacking bin

Where standard bins often go unnoticed, this orange stacking bin immediately stands out. This makes it particularly suitable for situations where quick recognition is essential, such as in catering, events or production processes with colour coding. This not only makes work more organised but also increases efficiency in daily operations.

In addition, the bin is designed for intensive use. The smooth and closed design prevents dirt or liquids from accumulating, ensuring cleaning is quick and hygienic. This not only saves time but also keeps the stacking bin in top condition for many years.

Made for intensive use

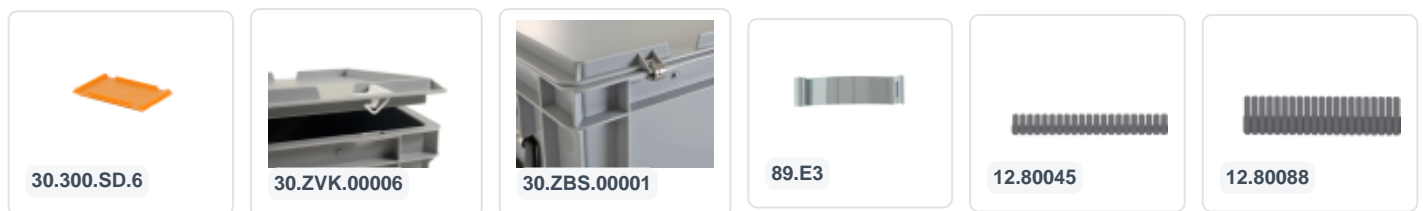

Another advantage of this model is its high load capacity. Despite its compact size, the bin can handle up to 100 kg stacking load. This means several bins can be stacked safely and stably on top of each other, saving valuable space in storage and transport. The ergonomic design with sturdy grip edges also ensures comfortable and safe handling, even with frequent use.

Durable and versatile in use

The plastic Euronorm stacking bin is made of high quality PP material, making it resistant to intensive use, temperature fluctuations and cleaning processes. As a result, the bin is not only suitable for the food industry but also for a wide range of logistics applications. The striking orange colour also provides additional possibilities for visual organisation and branding.
