Description

Blue plastic stacking crate 600 x 400 x H 233 mm - suitable for food. The stackable crate features smooth inner walls, raised corners, and lowered side walls. The bottom is smooth and reinforced. Due to its size and food-safe material, these crates are highly suitable as cultivation containers for insect farming. When stacked, the crates create a dark growing environment, as desired in insect farming. The raised corners ensure sufficient space between the crates for ventilation or feeding the insects. The internal dimensions of the plastic crate are 568x368xH219/110 mm. Stackable insect farming crates are also available in black.
