# Description

**E1 Euro meat container in blue**

E1 plastic stacking bin (600 x 400 x H 125 mm - 20 liter) in blue. Blue version of the E1 Euro meat container in pool design (red). With a ventilated upper rim for optimal cooling.

**Application**

The blue E1 stacking bin is identical to the red pool version of the E1 bin. The blue version is also used as a meat bin, but usually internally or in closed external circuits, for example with one specific customer. The special colour is used to distinguish between different departments or applications. This colour variant is also widely used as a universal fresh produce crate for products where ventilation and cooling play an important role, particularly food products. Thanks to their Euronorm format, E1 stacking bins can easily be used with standardised mobile plastic trolleys and plastic pallets. Our EURO H1 pallet with red GS1 approval mark was developed as a standardised pallet for the E1 bin. Other plastic pallets from our range are also excellent load carriers for this blue E1 stacking bin.

**Product details**

The E1 bin has a ventilated upper rim with integrated handgrips on all 4 sides. This ensures optimal ventilation and cooling of meat products, as well as easy handling. The bin is fitted with studded areas for temporary stickers.

Thanks to its standardised dimensions, the E1 Euro meat container can be used seamlessly with all other Euronorm stacking bins, as well as with standardised mobile plastic trolleys or roll containers. Our EURO H1 plastic pool pallet (1200 x 800 mm) with GS1 approval mark was also developed for the safe transport of E1 stacking bins. For users of industrial-size pallets (1200 x 1000 mm), we offer the H3 plastic pallet. All types of Euronorm bins can also be transported safely on this pallet. In all cases, the Euronorm dimensions ensure safe and efficient use.
