Properties

Featuring a reinforced diamond-pattern bottom.

The standard version comes with closed handles.

Lidded containers are stackable even with the lid.

Lidded containers have a removable hinged lid.

The lidded container is supplied with two snap-lock closures on the lid.

Description

Stackable container with hinged lid in Euro norm size 600 x 400 mm. Made of food-grade plastic. The lidded container consists of a stacking box, hinged lid, and two snap-lock closures. The lidded container has a closed bottom with reinforced construction. The stacking box is therefore highly suitable for heavier loads. The hinged lid is removable when open. The container is also stackable with the lid. Due to its standardized dimensions, the lidded container is stackable with all other Euro norm stackable containers. Additionally, the lidded container fits perfectly and without space loss on standardized pallets, roll containers, and mobile bases. We supply foam interiors, seals, and label holders as accessories for the lidded containers.
