Stacking crate / bicycle crate - 400 x 300 x H 273 mm - closed walls - open base - red

Product specifications

External dimensions (L x W x H)	400 × 300 × 273 mm
Internal dimensions (L x W x H)	372 × 272 × 260 mm
Capacity	26.3 liter
Handles	Open (2 pieces)
Sidewalls	Closed
Material	HDPE
Article number	30.027.19.J
Weight (kg)	1,3 kg
Temperature range	-30°C to +40°C, briefly up to +90°C
Color	Red
Bottom	Fine perforated, reinforced
Quantity per pallet	64
Stacking height (mm)	261

Properties

- **Robust plastic stacking crate / bicycle crate in Euronorm format 400 x 300 x H 273 mm**
- **With closed side walls and a finely perforated base**
- **With reinforced base for high dimensional stability, even under heavier loads**
- **Fine base perforations allow rainwater to drain away easily**
- **Low weight for comfortable cycling, steering and carrying**
- **Suitable as a bicycle crate for shopping, school and work items, sports and leisure**
- **Also suitable for children’s bicycles**
- **Made from food-safe plastic**
- **Weather-resistant and suitable for everyday outdoor use**
- **Easy to secure to a rear carrier or front carrier using cable ties**
- **Optional carrying handle available**

Description

Robust plastic **stacking crate / bicycle crate** in Euronorm format (400 x 300 x H 273 mm - 26.3 liter). Finished in **red** and fitted with closed side walls and a finely perforated, reinforced base.

Application

This stacking crate is particularly suitable for use as a **bicycle crate** on a rear carrier or front carrier. With a capacity of 26.3 liter, the crate offers plenty of space for shopping, school and work items, sports equipment and other everyday essentials. Thanks to its compact size and low weight, the bicycle crate is also suitable for children's bicycles.

The crate is made of plastic and is therefore considerably lighter than bicycle crates made of steel, wood or woven rattan. This makes cycling and steering more comfortable. Plastic also withstands a wide range of weather conditions well, making it highly suitable for everyday outdoor use.

Product details

The base of the crate is diamond-pattern **reinforced** and retains its shape well even under heavier loads. The fine perforations in the base allow water to drain away easily. The closed side walls protect the contents and prevent smaller items from falling out or protruding from the crate.

The stacking crate is made from **food-safe plastic**. Thanks to its 400 x 300 mm Euronorm base dimensions, it can also be easily combined with other standardised logistics equipment.

When used as a bicycle crate, the stacking crate can easily be secured to a suitable rear carrier or front carrier using **cable ties**.
