Towing coupling with spring mechanism for 4-wheel waste containers

Product specifications Properties

Article number	99.KK.1
Weight (kg)	4,22 kg

- **Innovative system for moving four-wheel waste containers.**
- **Specifically designed coupling for easy installation on these containers.**
- **A sturdy drawbar is placed on one side of the container for safe movement.**
- **On the opposite side, there is a folding coupling with a spring mechanism.**
- **The spring mechanism ensures smooth movement of the folding coupling.**
- **In the resting position, the folding coupling stands vertically against the container body.**
- **Easy activation of the coupling when needed for connecting/disconnecting.**
- **Focused on efficiency, safety, and user-friendliness for waste processing.**
- **Ideal for waste collection, recycling, and general waste processing.**
- **Simplifies the transportation and mobility of waste containers.**
