Product specifications

External dimensions (L x W x H)	790 × 605 × 685 mm
Internal dimensions (L x W x H)	725 × 540 × 575 mm
Capacity	210 liter
Sidewalls	Closed, smooth
Material	HDPE
Article number	81021010
Weight (kg)	8,9 kg
Temperature range	-30°C to +40°C, briefly up to +90°C
Color	White
Bottom	Closed, smooth
Quantity per pallet	13

Properties

- **Transport bin 210 liter - colour white**
- **Fully food-grade - seamless and made in one piece**
- **Nestable design - stackable with matching lid (2 high)**
- **With extremely smooth walls and base - without external ribs**
- **Fitted with 4 feet - closed and smooth on the underside**
- **With a stainless steel rim reinforcement on both long sides**
- **Easy to clean thanks to the smooth inner and outer walls**
- **Resistant to most chemicals and common cleaning agents**
- **Not suitable for prolonged outdoor use (not UV-resistant)**
- **Nested stack height: 115 mm - stacked height: 660 mm**
- **With outlet provision on one short side - this can be drilled to the desired diameter and threaded if required**
- **Options: drop-on lid - printing - QR codes and barcodes - mobile dolly - wheels instead of feet (note: not liquid-tight) - 1" or 2" screw plug - conical plug 40 mm - 1" or 2" ball valves - extension feet**

Description

A 210 litre transport and storage bin with an extremely smooth, hygienic and easy-to-clean design. Widely used in high-care environments, the food industry and meat distribution. It is also traditionally used as a brining bin for salting meat and meat products.

The construction

Our 210 litre transport bin is made of high-quality HDPE plastic and has very thick walls. This makes external ribs unnecessary - both on the walls and the base. The result is an exceptionally easy-to-clean bin. In addition, the inside is also extremely smooth and rounded, making it easy to empty and excellent to clean here as well. The top of the bin is externally reinforced with two stainless steel profiles, allowing the bin to be used with liquids too, for example during brining.

Use

Because this transport and storage bin is intended for use with perishable goods and high-care products, lids are recommended. With a lid, these bins are also easy to stack. When stored empty, they can be nested if required. Because they stand on feet, the bins can be picked up easily with internal transport equipment. If bins need to be lifted apart, this can be done by inserting a forklift under the top rim and then lifting.
