

# Transport bin 400 liter - 945 x 725 mm - nestable - on feet - green

## Product specifications

|                                  |                                  |
|----------------------------------|----------------------------------|
| External dimensions ( L x W x H) | 945 x 725 x 830 mm               |
| Internal dimensions (L x W x H)  | 875 x 695 x 705 mm               |
| Capacity                         | 400 liter                        |
| Sidewalls                        | Closed, smooth                   |
| Material                         | Recycled HDPE                    |
| Article number                   | 81011520                         |
| Weight (kg)                      | 17,4 kg                          |
| Temperature range                | -30°C to +40°C, briefly to +90°C |
| Color                            | Green                            |
| Bottom                           | Closed, smooth                   |
| Quantity per pallet              | 8                                |

## Properties

Transport bin 400 liter - colour green

For general use in warehouses, production companies and agricultural businesses

With hot-dip galvanised rim reinforcement on both long sides - for use with liquids (e.g. rainwater)

Nestable design.

With seamlessly smooth walls and base - without external ribs

Fitted with 4 feet - closed and smooth on the underside

Easy to clean thanks to the smooth inner and outer walls

User-friendly thanks to the high degree of rounding

Resistant to most chemicals and common cleaning agents

UV- and weather-resistant - freeze-resistant down to -30°C

Nested stack height: 198 mm - stacked height: 830 mm

With 1" outlet provision on one short side fitted with a screw cap

Options: drop-on lid - mobile dolly - wheels instead of feet (note: not liquid-tight) - 1" or 2" ball valves - extension feet

## Description

Large-volume bin with a seamlessly smooth and easy-to-clean design. Widely used for agricultural applications, in warehouses at production sites and even as a rainwater reservoir in gardens.

### The construction

This 400 litre transport bin is made of homogeneous HDPE plastic and has very thick walls. This makes external ribs unnecessary - both on the walls and the base. The result is an exceptionally easy-to-clean bin. In addition, the inside is also extremely smooth and rounded, making it easy to empty and excellent to clean here as well. The top of the bin is externally reinforced with two hot-dip galvanised steel profiles, allowing the bin to be used with liquids too - for example for collecting rainwater.

### Use

This transport and storage bin is used for a wide range of applications. Wherever smooth walls are valued so that contamination has no chance. Mobility of the bin is possible thanks to the 4-foot design. When empty bins need to be stored, they can be nested to save space - we call this "nested". The lid also ensures safe storage of the contents.
