Properties

Product tray made of reinforced polyamide in Euronorm size 600 x 400 mm, but also available fully customized.

For a trouble-free and scratch-free cleaning of high-quality parts.

Also extremely suitable for safe transport and trouble-free storage of these components.

Significant cost savings as there is no need for repacking between cleaning, transport, and storage.

Flexible layout of the product tray using plastic pins and strips.

The layout of the grid-shaped base plate can be variably designed and changed at any time.

Safe positioning of metal parts thanks to the custom layout.

Optionally available with stacking pins for stable stacking of multiple Variogrid trays.

The open construction provides maximum accessibility for the cleaning agent.

The Variogrid is very stable and has a high load capacity, and moreover, it has a low own weight.

Made of reinforced polyamide and suitable for many chemicals. Testing under practical conditions is necessary. Ask our product specialists for the exact specifications and possibilities.

Various parameters play a role in temperature resistance. Ask our product specialists for the exact specifications.

The Variogrid product tray is also easy to integrate into existing systems, such as metal wire baskets, KLT containers, and steel boxes.

Available with handles in multiple sizes for easy and practical handling.

Due to the Euronorm size 600 x 400 mm, it is stackable on all common Euronorm stacking containers and crates.
