Description

Our BIG BOX

The BIG BOX is an especially robust plastic pallet box that is also highly versatile. Thanks to its strong product features, this pallet box series has been launched in many different versions - and very successfully.

Our BIG BOX in widened version

The product variant shown here is a widened version, which means it is a custom-made box. This widened variant is made up of two pallet boxes that are mounted across the width and welded together very solidly - exactly in the required size.

Applications

The industries in which XL-size pallet boxes are used are very diverse. In all cases, however, they are intended for the storage or transport of long goods or bulky goods. The correct box size is important here, suitable for that one specific application. Transoplast has developed a wide range of XL pallet boxes as custom-made solutions. The choice is therefore already particularly extensive. If your required size is still not included, please contact our product specialists - they will be happy to help you further.
