Product specifications

External dimensions (L x W x H)	2240 × 1000 × 760 mm
Internal dimensions (L x W x H)	2150 × 910 × 610 mm
Capacity	1245 liter
Sidewalls	Open
Material	HDPE
Article number	4401.400.DUO.L2
Weight (kg)	65 kg
Temperature range	-30°C to +40°C, briefly up to +90°C
Color	Grey
Bottom	Open, reinforced
Max. load capacity per box	500 kg
Max. static stacking load	3000 kg

Properties

- **The XL BIG BOX is assembled lengthwise from two BIG BOXES**
- **The length of the XL BIG BOX is adjusted to your requirements**
- **The boxes are divided to the required length, then connected and finally welded on the inside and outside**
- **Standard size 2240 x 1000 x H760 mm - 1245 liter**
- **With perforated side walls and base for optimal ventilation and drainage of condensation**
- **The perforations are rounded on the inside of the box to prevent product damage**
- **The side walls are designed in a convex shape for extra volume**
- **The walls are seamlessly welded on the inside and outside, so that the vulnerable contents are protected**
- **Fitted with 6 robust feet**
- **Suitable for direct contact with unpackaged food products (food-proof)**
- **Our XL-size BIG BOXES are highly suitable for heavy and intensive use**
- **BIG BOXES in XL size are designed as standard to be rim-stackable**
- **With an outlet facility (1'' and 2'') on all sides**
- **Options: Lid - print - QR codes and barcodes - closed version**

Description

The perforated XL BIG BOX - ideal as a pepper box

This perforated XL BIG BOX pallet box has been specially developed for the efficient storage and transport of large quantities of fruit and vegetables, including peppers. Thanks to its extra-large size (standard 2240 × 1000 × H760 mm) and sturdy construction, this model is widely used as a pepper box or pallet box for peppers.

The pallet box is made of food-safe plastic (HDPE) and meets the strict hygiene requirements that apply within the agricultural sector and food industry. This makes the box particularly suitable for growers, traders, auctions and sorting or packing centres that work with peppers or similar products such as tomatoes, cucumbers and aubergines. Thanks to the large size of the box, this XL version works very efficiently. In pepper cultivation, this box is the standard for tipping systems, buffer systems and internal transport.

Product features

This double plastic pallet box is assembled lengthwise from two pallet boxes. This results in an extra-long box with a capacity that is ideal for large volumes. The box is fitted with:

- 6 sturdy feet for stable positioning and easy handling with a forklift truck or pallet truck
- Perforated side walls that ensure optimal ventilation and air circulation, helping peppers stay fresh for longer during storage and transport
- Perforated base for ventilation and drainage of condensation
- Reinforced base for maximum load capacity and durability, even under heavy loads
- A mechanical connection ensures a particularly robust construction and a long service life
- Finished with a plastic weld for a seamless inside and outside finish

The benefits for pepper cultivation and processing

The XL pallet box can be used widely in agriculture and throughout the entire food chain. Specifically for pepper cultivation, this box offers important advantages:

- Efficient handling of large quantities of peppers thanks to its generous size
- Food-safe plastic that meets hygiene and export standards
- Ventilated walls and base that help prevent spoilage and loss of quality
- Suitable for both storage and transport of fruit and vegetable products
