Description

The SB3 TRIO pallet box with funnel base measures 1200 x 1000 x H 1770 mm and has a capacity of 1500 liter. The box is built from three SB3 pallet boxes welded seamlessly on top of each other. This large-format plastic pallet box features a 120 x 120 mm outlet at the bottom, centrally positioned in the base. This opening can be closed manually with a slide gate operated from the short side of the box.

The inside of the SB3 TRIO box is smooth and funnel-shaped at the bottom with a 35° slope, allowing the contents to flow out easily when the slide gate is opened. This makes tilting or dumping the box unnecessary. Ideal for dosing dry bulk goods such as seeds, grain and dry animal feed, but also granulates, wood pellets and small components. The pallet box and the entire inner construction are made of food-grade plastic, so direct contact with food is not a problem.
